2019

A YEAR OF FIGHT AGAINST POVERTY
In 2018, we improved the lives of almost 1.5 million people thanks to the support of more than 105,000 contributors and 700 companies and public institutions. Today, they know that justice, equality and dignity are not empty words.

We are known for our work in developing countries and also for our work in Spain, where we have been investing for 37 years. We have a presence in 24 cities and 30 autonomous communities in Spain.

We work to reduce the digital divide and to promote the educational development of children and young people as agents of change.

We are a continuous and transparent organization. We make a continuous and transparent evaluation culture.

We are a continuous and transparent organization. We make a continuous and transparent evaluation culture.

We are aware of the importance of providing transparency and accountability in our work and communications. To measure and ensure the effectiveness of our actions, we have a system for monitoring and evaluating our programs, projects, and initiatives.
